

TECHNICAL INFORMATION

WESTCO CBS Soft Granule (n-cyclohexyl -2- benzothiazole sulfenamide)

Westco CBS is a delayed action accelerator suitable for natural rubber and synthetic rubber; produces vulcanizates with high modulus and high tensile strength.

Specifications

Appearance	Grey white to light yellow
Form	Soft Granule
Initial Melt Point, °C.	*98 min
Final Melt Point, °C.	*99 min
Moisture, %	*.5 max
Ash content, %	*.5 max
Sieve residue (100 Mesh),%	NA
Sulfenamide, %	96 min
Total sulfur, %	*23-24.7
Content of oil, %	NA
Free amines (Cyclohexylamine), %	*0.5 max
Grain strength	*1-2
Alcohol Insolubles, %	0.5 max
Specific Gravity, typical	1.29

* Actual data will be reported on Certificate of Analysis
