

TECHNICAL INFORMATION

WESTCO B-75

A dispersion of B-25 on an inert filler. Westco B-75 is an antioxidant for natural and synthetic rubber compounds where resistance to heat aging and flex cracking is important and where staining and discoloration of light colored rubber are not objectionable.

Specifications:

Appearance:	Dark Brown Powder
*Activity, %:	65-75
*Moisture, %:	4.0 max.

*Reported on Certificate of Analysis
