

## TECHNICAL INFORMATION

### WESTCO DPTT

Westco DPTT is used as the primary or secondary accelerator in natural and synthetic elastomers and as a sulfur donor in low sulfur or sulfurless cures. Westco DPTT is non-staining and is suitable for use in light colored vulcanizates. Westco DPTT provides better processing safety and heat stability than other thiurams.

#### Specifications

Appearance	light gray yellowish powder
*Initial Melt Point	113°C Min
*Moisture	0. 5% Max
*Ash	0. 5% Max
*Sieve residue (150 mesh)	0. 1% Max
*Oil content, %	1-2

\* Actual data will be reported on Certificate of Analysis
