

WESTCO™ MBDS Accelerator
4-Morpholinyl-2-benzothiazole disulfide
CAS# 95-32-9

Technical Data:

WESTCO™ MBDS is a sulfur donor accelerator characterized by fast-cure and excellent scorch safety. Generally used in compounds with low or no sulfur.

Specifications

Appearance	Light Yellow Soft Granules or Powder	
	Powder	Granules
*Melting Point	125°C Min.	125°C Min.
*Moisture	0.3% Max.	0.3% Max.
*Ash	0.3% Max.	0.3% Max.
*Residue on 100 mesh	0.1 Max.	-
*Oil content	1-2%	-
*Grain strength	-	0.5 - 1.0
Specific Gravity, typical	1.51	1.51

* Actual data will be reported on Certificate of Analysis

Packaging: 25 Kg Net Bags
